

OpenText™ NFS Client

The most complete NFS and host access solution for enterprise connectivity needs

OpenText NFS Client allows Microsoft® Windows® users to access file and printer resources residing on UNIX®, Linux®, VMS, Macintosh®, and many NFS-enabled hosts. NFS Client offers high performance, security, and convenience, without modifying host systems.

OpenText NFS Client supports all the latest developments in the industry-standard NFS protocol, including NFSv2, v3, and v4; WebNFS; GSSAPI-Kerberos implementation; and LIPKEY security infrastructure.

For added value, OpenText NFS Client is bundled with the terminal emulation suite, OpenText HostExplorer™. HostExplorer provides fast and reliable connections from a PC desktop or web browser to IBM mainframes, AS/400s, UNIX/Linux systems and other enterprise hosts.

Technical Specifications

CERTIFICATION	<ul style="list-style-type: none"> • FIPS 140-2 compliant
NFS SUPPORT	<ul style="list-style-type: none"> • Supports NFS versions 2, 3, and 4 (RFC1094, RFC1813, RFC3530) • Both client and server implementations • Kernel mode implementation • Native 64-bit support for Microsoft Windows x64 family • Supports operation in IPv6 networks • Supports Setuid and Setgid • Supports WebNFS (RFC2054) and NFS over TCP • Supports Microsoft UNC • Device-less connection support
TERMINAL EMULATION	<ul style="list-style-type: none"> • Support for 3270, 5250 and VT emulation for UNIX • Printing and file transfer support • Support for multiple code pages (Euro ready) • Integrated web-to-host capability • Integrated with HostExplorer FTP • Macro engine—recording, editing, and playback • Support for HLLAPI, EHLLAPI, WINHLLAPI, OHIO, OLE, and COM APIs
DIRECTORY SERVICES SUPPORT	<ul style="list-style-type: none"> • Supports multiple directory service profiles for each directory service type • Supports per-connection selection of directory service profile • Supports NIS, NIS+, LDAP, and Microsoft Active Directory® • Supports schema definitions including: RFC2307, RFC2307AIX, AD4UNIX, and Vintela VAS • NFS server browsing • Auto-mount capability
SECURITY	<ul style="list-style-type: none"> • Supports RPCSEC-GSS (RFC2203) and GSS-API (RFC2078) • Supports Kerberos and LIPKEY as GSS providers • Supports Solaris® ACL and SASL protocol for authenticating with Microsoft Active Directory domain (RFC2222)
NAME MAPPING SERVER	<ul style="list-style-type: none"> • A stand-alone server to map Windows user and group to UNIX UID and GID • Supports Auto Mapping and Import/ Export of mappings • Integrates with Directory Services • Intelligent Name Mapping Cache for improved productivity
